Life Science Production is a division of Life Science Group Ltd. Life Science Group Ltd is an ISO 9001:2015 and ISIA Traceability Certified company.

LSP 
LIFE SCIENCE PRODUCTION

Product range

All serum is processed with complete traceability from collection, throughout processing to delivery. To learn more, call us on 01234 889180 or email us at sales@lifesciencegroup.co.uk.

Foetal Bovine Serum (FBS)

Available origins include Brazil, Australia, USA, New Zealand and Central America. All batches are triple 0.1 micron filtered and tested for viruses, sterility, endotoxin and mycoplasma.

Human AB Serum

Human AB serum is available from US and EU sources. Filtered to 0.1 or 0.2 micron, all batches are tested for viruses, sterility, endotoxin and mycoplasma. Also available for further manufacturing.

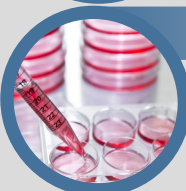

AQIX® Biopreservation Medium

AQIX® is a synthetic interstitial fluid suitable for the transport and maintenance of isolated cells and tissues in a viable state, at ambient or cold temperatures.

Human Platelet Lysate (hPL)

hPL is a cell growth supplement for human cells manufactured from human platelets. It is suitable as a replacement for FBS or human serum. Gamma irradiated hPL is available for further manufacturing.

Cell Culture Media & Reagents

LSP offers a full range of cell culture media, specialised media, supplements and buffers for mammalian, plant and insect cell culture applications.

Other products

LSP offers a wide range of sera for cell culture or other purposes. Other cell culture reagents include Bovine Serum Albumin, Chick Embryo Extract, animal-free 3D culture matrix, animal and human serum proteins, and complement.
