

One of the UK's leading suppliers for off-the-shelf and custom biological products, also offering contract manufacturing services for life science research requirements worldwide

OUR QUALITY PRODUCTS

Life Science Production (LSP) offers a range of cell culture sera, both animal derived and human, including Foetal (Fetal) Bovine serum (FBS), Newborn Calf Serum (NCS), Human AB Serum and Human Platelet Lysate (hPL) for both research and cell therapy applications.

In addition, we offer a wide range of cell culture media and reagents (including Corning) and BSA, designed to support the growth and maintenance of a variety of mammalian, plant and insect cells. Many of our media can also be adapted for specific use. All our serum is processed with complete traceability from collection, throughout processing to delivery.

- Bioprocess and Scale Up (Single-use technology)
- Blocking Serum
- Bovine Serum Albumin (BSA)
- Cell Culture Media
- Cell Culture Reagents
- CellShip® Fully Defined, Xeno-free Cell Transportation Medium
- Chick Embryo Extract (CEE)
- ELAREM™ Prime Cell Culture Supplement
- Foetal Bovine Serum (FBS)
- Human AB Serum
- Human Platelet Lysate (hPL)
- Human Platelets
- Human Serum Albumin
- Newborn Calf Serum (NBCS)
- Other Animal Sera
- Petaka G3™
- Platelet Matrix
- Reagents and Antibodies for COVID-19 Research
- Serum Complement
- Storage and Transportation Media (Cells/Viruses)
- T-Store® Tissue Storage and Transportation Medium.

CUSTOM CONTRACT SERVICES

We are a well-known manufacturer and distributor of cell culture reagents. As a leading manufacturer of sera for the past 30 years, this makes us an ideal partner of contract manufacturing and OEM services to the *in vitro* diagnostic industry.

All our wide range of contract services can be tailored to individual specifications and requirements. In addition, we offer our in-house expertise, two Class 5 ISO 13408-7:2012 cleanrooms and maintain large frozen (-20 °C) and ultra-low temperature (-80 °C) storage facilities.

All operations are carried out in our UK facilities, manufacturing with fully disposable, single-use systems. We are ISO 13485 certified for the manufacture of IVDs.

- Sterile filtration and aseptic filling in a controlled clean room environment
- Flexible packaging in bottles or industrial single-use bags
- Upstream and downstream formulation
- Cell culture media and liquid formulation optimization
- Research and pilot-scale freeze-drying
- Batch sizes from 1 to 1,000 litres.

YOUR PARTNER FOR CUSTOMISED BIO-MANUFACTURING

- First-class customer service
- Approachable and flexible technical teams
- Full traceability on all products
- All products manufactured to defined specification
- Strong company ethics, to ensure all clients can be totally confident their project is in safe hands
